## Give travelers and their assistants the convenience of reserving train service online.

Fed up with airlines charging you for everything from a carry-on bag to a pack of peanuts? If you are not in a rush to get to your destination, why not relax on a train?

The Rearden Personal Assistant now offers users the convenience of booking train, car, and hotel reservations in a single itinerary. Train results are displayed in a look and feel consistent with airlines, and you can search for a hotel closest to a train station. Other handy features include the ability to filter results by class of service and time windows, display multiple fares for the same train, and store credit card information as a default form of payment. U.S. travel is on Amtrak, which completes the ticketing, and the Rearden Personal Assistant credits your Amtrak membership program.

Now you have more options than ever for getting from Point A to Point B. Plus you can avoid the hassles of airport security and flight delays!

### What it Means for Companies:

- Increase adoption by offering more options for travel
- Create an itinerary that meets employee needs and complies with corporate policy and utilizes corporate discounts
- Provide rich content for information on train schedules and routes

### What it Means for Employees:

- Book train, car, and hotel reservations in a single itinerary
- Search for a hotel closest to a train station
- Automatically updates calendar with reservation details
